I am very concerned about the current draft cleanup plan for the Portland Harbor Superfund Site. Please consider revising the plan in the following ways, so that all Portlanders – people and wildlife – can finally get the clean, healthy, safe river that we all deserve.

1. Select Alternative G with additional dredging in areas of high human use, areas of high ecological value, and areas where there is high risk of recontamination of the river.
2. Set much clearer timelines and metrics for success, including setting an explicit date by which Portland Harbor specific fish consumption advisories will be lifted for all of us, including pregnant women and children.
4. Include the heavily contaminated uplands in the clean-up plan, as well as the heavily contaminated river.
5. Eliminate the confined disposal facility which would create a permanent toxic waste dump in our river. The contaminated sediment should be removed and taken to an appropriate landfill.

Thank you for your time, and for caring about the environment in Portland. We appreciate it.
